

## Manooga Products Fully Moulded Acrylic Vanity Tops

### Guarantee and Care

#### **Manufacture:**

Manooga Products acrylic vanity tops are manufactured from a high quality sanitary grade acrylic, which is vacuum formed over precision dies then solid backfilled with a resin/filler mixture and timber core insert.

They are inherently very durable and with proper care will look good for many years.

#### **Advantages of Manooga Acrylic manufacture:**

- ❖ High Impact Resistance - Reduces likelihood of chipping and crazing.
- ❖ High Heat Resistance - eliminates long term crazing caused by continual heat changes from hot & cold water.
- ❖ High abrasive and chemical resistance.
- ❖ Easy Repairability - Should accidental marks or scratches occur, these can be easily removed by lightly sanding and polishing.
- ❖ Attractive “glass like” gloss finish that matches the material in your bath.

#### **Australian Standards:**

Manooga Acrylic Tops comply with Australian Standards AS1730.

#### **Manooga Guarantee:**

Manooga guarantee their Acrylic Tops for 10years against normal wear and tear. Proudly manufactured in Australia by an Australian family company.

### Care and Cleaning

*Manooga’s acrylic vanity tops are “easy – care”.*

*A simple wipe over with a damp cloth is usually sufficient. Any non-abrasive domestic cleaner can be used and will not harm the top. The use of abrasive cleaners such as Gumption or steel wool will scratch and dull the surface and should not be used.*

*For more stubborn stains, the use of methylated spirits or a No.1 car polish often works well.*

*If you have any queries please contact our Factory for advice.*
